

# Ullas Jain

Bengaluru, India / (+91) 8123171798 / jainullas1994@gmail.com / [linkedin](#)

**Curiosity driven, fluent in Kotlin**, Android developer with the flair of writing smooth user interfaces. Proven track record with **5 years' experience** in investigating, prototype, design, architect, test & delivering **large-scale android** applications. Adept in documentation, delegation & mobile sdk's. Proud **advocate of TDD** and clean code.

**Product developer, devX team** - [gojek](#). Bengaluru, 01/2018 - present.

(Kotlin, Java, Kotlin-Script, Android-SDK, Rxjava, mobile-sdk, MVP/ MVVM, room-db, XML, API, dagger, junit5, CI/CD)

- Designed **server-driven architecture** to have seamless integration of UX flows which **saves 100% man hours**.
- Created easily readable, testable and **reusable UI components** on rewards and QR-code/p2p/bill payments.
- **Leveraged the data to reduce app-size by 10%** which had **300+ modules**. Made it scalable and extendable.
- Built an internal configs library to **ease a/b testing** across 4 apps(50M+) which **removes 95% of repeated code**.
- Increased [truck factor](#) of the team by advocating **code-roast sessions** and co-managed biweekly meetings.
- Been an **agent of change** on how the team operates to decrease the cultural barriers.
- Active participant in code reviews, **hiring processes** and enforced pair-programming.

**Lead Android developer, Tapzo**. Bengaluru, 06/2016 - 01/2018.

(Java, Android-SDK, XML, MVP, Scrum, dagger, junit4, git)

- Managed a team of 6. Worked closely with them and organized regular 1:1's.
- **Architected end to end UI flows** which had multiple sources with **real time order and cart updates**.
- Involved in sprint planning, estimation, retrospectives, design review, demo, analytics, caching and testing.
- Mentored 3 interns & 1 junior developer on android-development and office procedures.
- Effectively on-boarded teams to develop new features using TDD.
- Started a leadership **reading club** and collectively exchanged ideas in monthly sessions over pizza.

**Software developer intern, Tapzo**. Bengaluru, 01/2016 - 06/2016.

(Java, JDBC, Ajax, HTML5, CSS3)

Developed a local webpage to measure user flows such as DAU, MAU and retention cohorts.

## EDUCATION

**Bachelors in Information science and Engineering, 2012 - 2016**

R.V. College of engineering, 8.48 CGPA, Bengaluru, India

## SKILLS

**Aptness in writing smooth user interfaces.**

Designed and developed several UI flows which includes API integration, animations, recycler-views, localisation, analytics, caching, transitions and database operations. Skillful in agile workflow(SDLC) and release processes of mobile applications. Capable of **multitasking** & worked on multiple-apps at the same time.

**Skillful in creating, maintaining Mobile SDK/libraries and documentation.**

Created configs library. Solved critical issues on **versioning and conflict resolution**. Wrote clear, relevant RFC's and internal SDK documentation. Wrote SOP for standardising 3rd party library usage.

**Team player and Mentor with attention to detail. Empathetic and approachable.**

Collaborated with cross-disciplinary multinational teams. Organised meetings with multiple teams & **delegated** tasks on a major launch. Mentored 3 interns on agile & android practices. Compassionate with team members.
