## WORK EXPERIENCE

### Product developer, devX team
### gojek ↗

*01/2018 - Present*

*gojek is a Super App. It's one app for ordering food, commuting, digital payments, shopping, getting a massage and a dozen more services across South-East Asia.*

*Achievements/Tasks*

- Built configuration providing library that removed 95% of repeated code for configs across 4 different applications.
- Saved 100% of man-hours with **server-driven components** for bill payment modules.
- Increased truck factor of the team by advocating code-roast sessions and co-managed biweekly android-cadence.
- Been an agent of change on how team operates to decrease the cultural barriers.
- Active participant in code reviews and hiring processes.
- Enforced pair programming and have built easily pluggable components.

### Android developer
### Tapzo ↗

*06/2016 - 01/2018*

*Tapzo was India's first all in one app which integrated with different players in the market.*

*Achievements/Tasks*

- Supervised a team of 6. Worked closely with them and organized regular 1:1's.
- Effectively on-boarded different teams to develop new features using TDD.
- Started leadership reading club and collectively exchanged ideas in monthly sessions over pizza.
- Trained 3 interns on android-development and office procedures.
- Designed and implemented food UI flow which had multiple sources with real time order and cart updates.
- Took full ownership of features.

### Software developer intern
### Tapzo ↗

*01/2016 - 06/2016*

*Achievements/Tasks*

- Developed a local webpage to measure user flows such as DAU, MAU and retention cohorts.

## EDUCATION

### Bachelors in Information science and Engineering
### R V College of engineering

*09/2012 - 08/2016*      *8.48 CGPA, Bengaluru, India*

## SOFTWARE

Android   Kotlin   Java   Git   JUnit-5
Groovy   Android-Studio   go-lang   python

## SKILLS

**Ability to create and maintain Mobile SDK/libraries**
- Built configurations library which is being used across 4 different applications.
- Solved critical issues in terms of versioning and conflict resolution while developing and integrating this library.

**Software development life cycle (SDLC)**
- Competent in all the phases of SDLC.

**Ability to write concise Documentation.**
- Capable of writing documents that are clear, short, precise, relevant and easy to read.

**Aptness in writing succinct RFC and SOP documents.**
- Skillful in writing clear and to the point RFC documents.

**Mentoring**
- Trained 3 interns and 1 junior developer about android and agile practices.

**Team Player**

**Attention to detail**

**Multitasking**

**Ability to Learn Quickly**

**Empathetic and Approachable**

## ACHIEVEMENTS

Successfully migrated 150+ modular app to androidX in 3 days. ↗
